The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

(3) assists the State to determine if additional water is available for future appropriators. (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) record of water use.

Statements of Water Division and Use must be filed by preparan and per 1914 appropriate water users. The filing of a statement (1) provides only when there is a surplus not needed by preparan water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

Reservoirs may be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served from the supply by an intervening parcel without reserving a right to the preparan right to the servient user's share the water supply with other riparian users.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.
